

Safety Notice

Please read before completing registration.

1. General Rules and Requirements

- Closed-toe shoes are required at all times.
- Walk — no running in competition or pit areas.
- Follow all instructions from event staff and posted signage.
- Keep food and drinks away from robots, fields, and electronics.
- Keep aisles and emergency exits clear; store bags under tables.
- Report any injury, hazard, or damaged equipment to staff immediately.
- Tie back long hair and secure loose clothing near moving mechanisms.

2. Non-LEGO Challenge Elements

Some challenges include elements that are not made of LEGO, including custom structures and parts made of metal or containing soldered components. For these elements:

- Handle them as described in the challenge rules or as directed by staff.
- Use non-LEGO tools only with supervision.
- Do not touch exposed wiring or solder joints; assume metal parts may have sharp edges or points.
- Do not modify or disassemble any robotic structures, unless given permission by coaches or event staff.
- If an element breaks, comes loose, or behaves unexpectedly, stop and notify staff - do not attempt repairs yourself until given direction.

3. Role-Specific Requirements and Protocols

3.1. Participants

- Never throw parts, tools, or equipment.
- Stay within your team's assigned area unless directed otherwise.

3.2 Coaches

- Review this document with your team before the event.
- Ensure every team member has a signed consent and release form.
- Supervise your team at all times; you are the first point of contact for any incidents involving your team.
- Know the location of first aid, exits, and the event coordinator.

3.3 Staff and Volunteers

- Review this document before the event.
- Inspect your station and its challenge elements before each round.
- Know the incident-reporting procedure and where first aid kits are located.

4. Incident and Emergency Protocols

- **Injury:** Stop the activity immediately and notify the nearest staff member. Staff will provide or call for first aid, contact the emergency contact on file if needed, and complete an incident report before the end of the day.
- **Equipment malfunction:** Power off if it is safe to do so, clear the immediate area, and notify staff. The station will only reopen after staff inspection.
- **Evacuation:** Leave equipment and personal items behind. Coaches gather their team, proceed to the posted assembly point, and report attendance to the event coordinator.
